*Highest Quality Components*

## WHO WE ARE

YOUNG POWERTECH Inc. and YOUNG POWERTECH CANADA LTD. are manufacturers and distributors of Mechanical, Hydraulics, Electric and Electronic assemblies for Construction, Farming, Marine, Mining and Industrial equipment.

YOUNG POWERTECH Inc. and YOUNG POWERTECH CANADA LTD. were started by people with decades of experience in the field that have owned and operated similar companies with great success. We are dedicated to bringing a higher level of products and services to our customers. With offices and warehouses in the USA and CANADA, YOUNG POWERTECH Inc. is prepared to service any customer requirements in North America.

We have partnered with some of the largest and best known manufacturers of several product lines. This enables YOUNG POWERTECH Inc. to supply drives systems from fractional HP to several thousand HP in every possible configuration to fit and improve most construction, farming, marine, mining, and industrial applications.

## OUR VISION

YOUNG POWERTECH Inc. seeks to become a preferred source for providing a complete and reliable engineering system from our product lines for our customers to reduce cost while improving system performance and customer satisfaction.

## OUR MISSION

Our mission is to provide long term value to our customers by delivering the best products and service while creating a mutually beneficial long term relationship with our stakeholders.

## Introduction

### COMPANY PROFILE

YOUNG POWERTECH Inc. supplies a full product range for power transmission and control.

In today's rapidly changing business environment, successful companies must have the flexibility and resources to meet the current and future needs of its customers. In our industry, we have the ability to supply advanced systems that are capable of performing in the most severe conditions. Our extensive product line allows us to supply complete packages or systems to improve equipment performance while minimizing the number of different suppliers that provide parts.

YOUNG POWERTECH Inc. has the products and the technical capability to "POWER YOUR IDEAS" by supplying one of the most complete ranges of products for any application. Our application engineering services help to validate that the design will meet the requirements of the customer.

### SUPPORT

Our partners manufacture very high quality products. We offer pre-sale and post-sale support and assistance if the customer experiences any issues with our products. A qualified network of sales professionals and technicians are available 24 hours per day around the world. Our goal is to resolve any issues in the shortest time possible as well as in the most professional manner.

### SERVICE

YOUNG POWERTECH Inc. with its partners around the globe ensures complete and continuous service all over the world. Our service organization consists of technical personnel and service centers that can support our customers 24 hours a day regardless of location. Our service centers have the resources to diagnose as well as make repairs.

## ORBITAL MOTORS GENERAL INFORMATION

### YMM

The smallest of the series with ROTOR and SHAFT DISTRIBUTION, is made to be used where small displacement, high speed and good performance is required.

### YMP - YMPH - YMPW

SHAFT Distribution and ROTOR type build with the most advanced technology used everywhere simplicity and low cost is required.

### YMR - YMRS

The smaller series with ROLLER gear type and spool valve distribution with high pressure seal that can operate without drain.

### YMH

With a SPOOL valve design and a ROLLER gear type this series is very versatile and with very high efficiency, very compact, high density power and suitable for many applications.

### YMER

This motor incorporates the ROLLER gear design and disc valve technology for maximum efficiency and smooth rotation. The shaft is supported by heavy duty needle bearing for high radial load.

### YMSY - YMSE - YMSS

The smallest series with ROLLER and DISC VALVE distribution, the YMS series has many advantages like LOW SPEED, HIGH VOLUMETRIC efficiency, smoother rotation and higher speed and pressure. Outputs shaft with tapered roller bearings for higher radial and axial load.

### YMT - YMTE - YMTS

This series of motors with advanced design ROLLER and self-balanced Disc Valve distribution with reduced frictions and very high efficiency, permits higher speed and pressure making it suitable for heavier duty applications. Also with standard high pressure seals can be used in series without drain line and shaft supported by Tapered roller bearings for high radial and axial load.

### YMV - YMVE

The largest series of our Orbital motor with standard HIGH pressure seals, ROLLER gear set and DISC valve, this motor can be used without drain line. The various options make them suitable for many applications.

## YMM

## *Single Cross-Port Relief Valve*

Port "A" or "B"  
With or Without Shuttle

## *Dual Cross-Port Relief Valve*

With or Without Shuttle

## *Single Counterbalance Valve*

Port "A" or "B"  
With or Without Shuttle

## *Dual Counterbalance Valve*

With or Without Shuttle

MANY OTHER VALVES AVAILABLE

## **BZZ SERIES Steering Valve**

The BZZ series has several different options.

- A) Open Center - Non Reaction
- B) Open Center - Reaction
- C) Closed Center - Non Reaction
- D) Load Sensing

## **10 SERIES Steering Valve**

The 10 series has several options and several variations.

### **CODE 101**

- A) Integral Pressure Control Valve
- B) Open Center- Non Reaction
- C) Open Center- Reaction

### **CODE 101-S With Integral Valves**

- A) Relief Valve
- B) Shock Valve
- C) Suction Valve
- D) Check Valve

### **CODE 101-5T Load Sensing System**

- A) Priority Valve
- B) Electro-Hydraulic Control Signal

### **CODE 103 Compact Valve**

- A) Open Center Non Reaction

### **CODE 103-S 103S-4 Open Center Non-Reaction**

- A) Relief valve
- B) Check valve

### **CODE 109 MINI STEERING UNIT, Open Center Non-Reaction**

- A) Relief Valve
- B) Relief And Check Valve
- C) Relief, Check And Shock Valve

## TLF - TLF 1 FLOW AMPLYIFIER STEERING UNIT

Used in place of Load sensing valve.

## BNF TORQUE AMPLYIFIER OPEN CENTER

This unit can transmit high torque output with low torque input.

A) Pressure relief valve

## FK SERIES VALVES

A variety of MANIFOLD valves that can be mounted directly on the steering valves for many functions.

## FLD FLOW DIVIDER VALVES

This series of valves is used to form a complete steering system in one unit.

## DYXL PRIORITY VALVES

Used with the BZZ5 type load sensing valve or with the TLF1 Flow amplifying unit to form a load sensing power unit providing metered priority flow to the SCU.

## PV PRIORITY VALVES

The PV (priority valve) is matched to the load sensing unit.

## LFF FLOW AMPLYFING VALVE

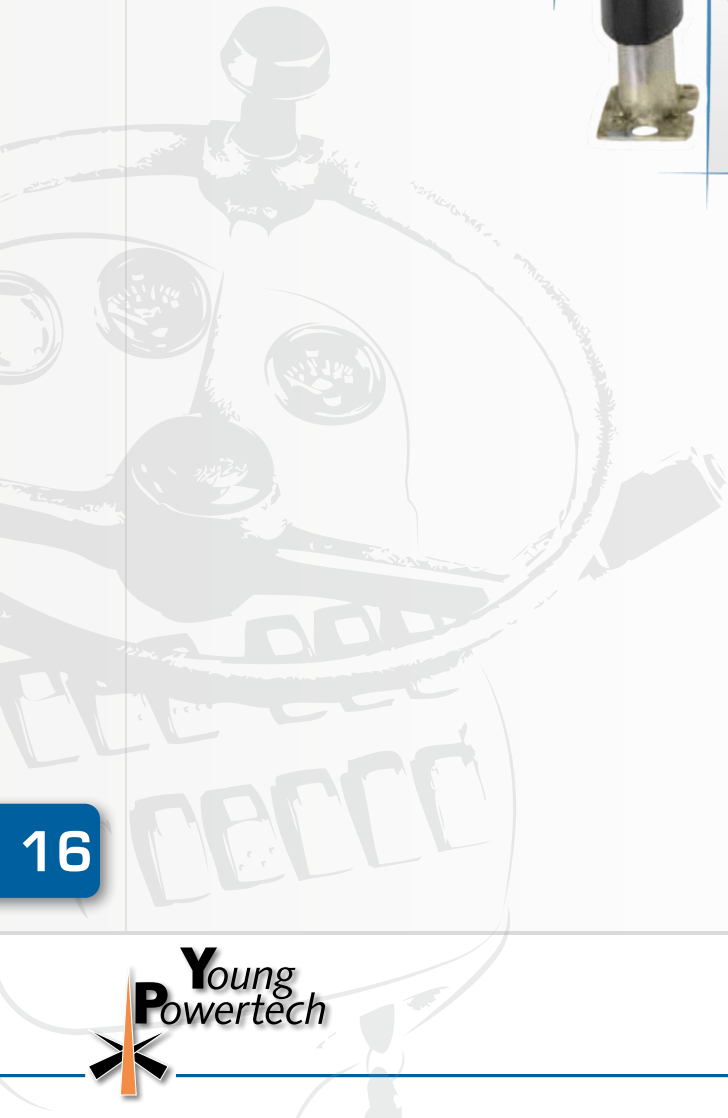

This valve uses small flow and low pressure to control large flow and high pressure. It can be used with the BZZ3 steering unit.

## LFA LFB FLOW AMPLYIFIER VALVES

With integral priority valve, directional valve, shock valve, and suction valve it can be used with 101-5TX series steering valve.

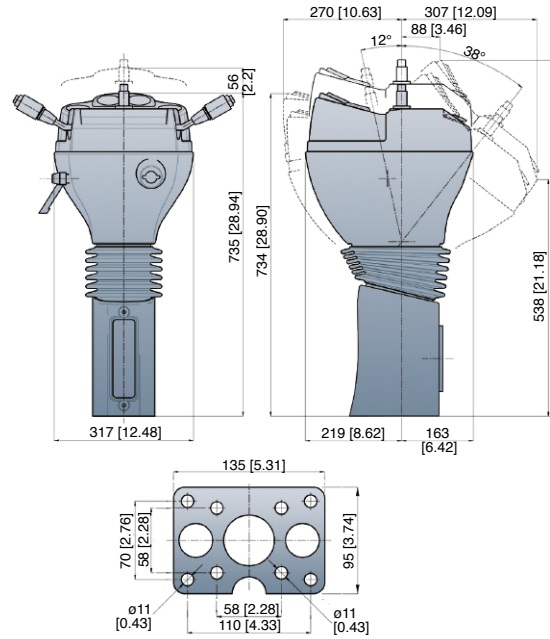

# Steering Columns

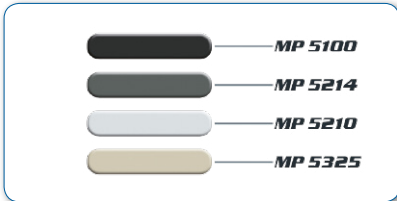

**PLUS**

## TECHNICAL SPECIFICATIONS

Steering column with 4 traditional instruments, 24 warnings LED lights and 12 switches. Available in different plastic colors: black, anthracite, light grey, light brown. Adjustable in horizontal and in vertical/horizontal positions.

Steering column with 4 traditional instruments, loud speakers, 24 warnings LED lights and 12 switches.

**SOUND**

Steering column with 4 traditional instruments, radio, loud speakers, 24 warnings LED lights and 6 switches.

**AUDIO**

Steering column with 4 traditional instruments, 24 warnings LED lights and 6 switches.

**STANDARD**

## YSC SERIES

- Cavitation resistant**
- Freewheeling and high speed**
- Continuous operation**
- Compact design**
- Higher mechanical efficiency**
- Higher speed and power than standard series**

### INTRODUCTION

#### YSC series

The YSC radial "OSCILLATING PISTON CYLINDER" type motors have the most advanced design today on the market. This makes it possible to achieve HIGH SPEED, HIGHER PRESSURE and a higher ratio power/weight size. Heavier duty Tapered roller bearings will permit higher radial and axial loads and longer life.

After many years of research and testing combined with new design concept and production technologies, the results is a superior motor with excellent performance in terms of cavitation resistance, high speed, and freewheeling operation.

Available in 5 frames with displacements from 2.44 CIR to 112 CIR and with power capacity from 30 to 150 HP, this series of motors has been successful in all kinds of applications from Mobile to Industrial, Marine, Mining and other applications where HIGH TORQUE and low smooth speed is required.

 (\*\*\*) Do not exceed maximum power  
 (\*\*\*\*) For motor operation with a continuous duty cycle at maximum continuous power the motor flushing is required  
 (\*\*\*\*\*) For motor operation at peak power flushing is usually required. For more information please contact our technical department

## YIAM SERIES

### INTRODUCTION

#### YIAM series

YIAM series motor range varies from 20cc to 8500cc displacement and it is completed by two-speed motors and special motors created in cooperation with our clients for different applications such as : underwater, high & low speed and wheel motors and with the possibility to assemble valves, brakes or gear reductions.

New bearing construction to prevent from seizure of the connecting rod with the external bushing. This could happen in high speed and high pressure working conditions and could lead to motor breakdown.

The new bearing design consists of:

**spacers, with function of**

- keeping roller axis parallel
- creating space between rollers to hold more oil

**spacer rings, with function of**

- keeping rollers lined up
- absorbing axial forces coming from connection rod

YIAM series

## YIAC SERIES DUAL DISPLACEMENT

### Working explanation

There is an external valve (that can be activated by a solenoid or a lever), that is responsible for the pressure change in the pressure commands. The pressure commands act on the two pistons inside the eccentric; the pistons move and therefore pull the eccentric, that cause the pistons stroke variation and, therefore the displacement change. In this manner we can have two displacements in the same motor.

### GENERAL INFORMATION

#### YIAC series

Young Powertech Inc. produces RADIAL PISTON HYDRAULIC MOTORS since 1985: our yearly production is more than 13.000 units which we sell all over the world through our agents and authorized sellers. Our motor range varies from 20cc to 8500cc displacement and it is completed by two-speed motors and special motors created in cooperation with our clients for different applications such as : underwater, high & low speed and wheel motors and with the possibility to assemble valves, brakes or gear reductions. You can directly contact our Technical Department which will give you all the necessary support to find the right solutions to your problems.

Young Powertech Inc. is a flexible work reality and manages deliveries within the same day of order; we produce motors exactly interchangeable with our competitors, always ready in stock which our customers particularly appreciate.

## YSTFC (HD) SERIES

This series of motor is based on the “hydraulically balanced piston rod” technology. Offering high efficiency, low noise, constant torque and long life even in the most severe applications

YSTFC (HD)

## YSTFD (HD) SERIES

This is a “two-speed” variation of the YSTFC. This series is based on the variable crankshaft which permits the motor to go from maximum displacement to zero during motion with a very smooth and constant torque output. By reducing the displacement and increasing the speed, we can meet many application requirements.

# Close Circuit Piston Pumps and Motors

## CLOSE LOOP PUMP AXIAL PISTON **C1-14/18** SERIES

### TECHNICAL DATA

Displacement	14 cc	0.855 CIR
	18 cc	1.099 CIR
Mounting Flange	SAE	"A"
Charge Pump	5.4 CC	0.330 CIR
Maximum Speed	3600 rpm	3600 rpm
Minimum Speed	700 rpm	700 rpm
Nominal Pressure	210 bar	3000 Psi
Maximum Pressure	270 bar	3915 Psi
Charging Pressure	20 bar	290 Psi
Max Case Pressure	2 bar	29 Psi
Suction Pressure	0.8 bar	11.6 Psi
Inertia Kg M1 / Lb-Ft	0.0014	0.033
Weight	7 Kg	15.5 Lbs

Peak operations must not exceed 1% of every minute. A simultaneous maximum pressure and maximum speed are not recommended.

#### Notes:

(1) The displacements 14/18 use the same external casing.

(2) The values shown are valid for an absolute pressure (pass) of 1 bar (14.5 psi) at the suction inlet port an when operated on mineral oil.

(3) Approximate values.

### Options

- 16/32 DP 9 T Shaft
- Pressure Filter
- UNF Ports
- Electric Cut-off

### Controls

- Manual without zeroing
- Manual with zeroing
- Hydraulic proportional without feed-back
- Hydraulic proportional with feed-back
- Manual lever with feed-back
- Two (2) position electric ON/OFF
- Electric Impulse

C1 - 14/18

# Close Circuit Piston Pumps

## CLOSE LOOP PUMP AXIAL PISTON **C2-21/28** SERIES

### TECHNICAL DATA

Displacement	21 cc	1.282 CIR
	28 cc	1.709 CIR
Mounting Flange	SAE "B"	SAE "B"
Charge Pump	11 CC	0.672 CIR
Maximum Speed	3600 rpm	3600 rpm
Minimum Speed	700 rpm	700 rpm
Nominal Pressure	210 bar	3000 Psi
Maximum Pressure	350 bar	5075 Psi
Charging Pressure	20 bar	290 Psi
Max Case Pressure	2 bar	29 Psi
Suction Pressure	0.8 bar	11.6 Psi
Inertia Kg M1 / Lb-Ft	0.0014	0.033
Weight	7 Kg	15.5 Lbs

Peak operations must not excide 1% of every minute. A simultaneous maximum pressure and maximum speed are not recommended.

#### Notes:

(1) The displacements 21/28 use the same external casing.

(2) The values shown are valid for an absolute pressure (pass) of 1 bar (14.5 psi) at the suction inlet port an when operated on mineral oil.

(3) Approximate values.

### Options

- 16/32 DP 13 T
- 16/32 DP 15 T
- Bypass Valve
- Pressure Filter
- UNF Ports
- Hot Oil Valve
- Power Limiter
- Mechanical or Hydraulic inching
- Pressure Cut-off
- Additional Pressure Gage Port

### Controls

- Hydraulic proportional without feed-back
- Hydraulic proportional with feed-back
- Electric proportional without feed-back
- Electric proportional with feed-back
- Electric 2 position ON/OFF
- Electric Impulse
- Auto

C2 - 21/28

46

## CLOSE LOOP PUMP AXIAL PISTON C3-46/50/64 SERIES

### TECHNICAL DATA

Displacement	46 cc	2.80 CIR
	50 cc	3.05 CIR
	64 cc	3.9 CIR
Mounting Flange	SAE "B"	SAE "B"
Charge Pump	13 CC	0.79 CIR
Maximum Speed	3600 rpm	3600 rpm
Minimum Speed	700 rpm	700 rpm
Nominal Pressure	250 bar	3625 Psi
Maximum Pressure	400 bar	5800 Psi
Charging Pressure	22 bar	319 Psi
Max Case Pressure	2 bar	29 Psi
Suction Pressure	0.8 bar	11.6 Psi
Inertia Kg M1 / Lb-Ft	0.0046	0.109
Weight	29 Kg	64 Lbs

Peak operations must not excide 1% of every minute. A simultaneous maximum pressure and maximum speed are not recommended.

#### Notes:

(1) The displacements 46/50/64 use the same external casing.

(2) The values shown are valid for an absolute pressure (pass) of 1 bar (14.5 psi) at the suction inlet port and when operated on mineral oil.

(3) Approximate values.

### Options

- 16/32 DP 15 T Shaft
- Pressure Relief Valve
- Pressure Filter W or W/O sensor
- UNF Ports
- Hot Oil Valve
- Power Limiter
- Mechanical or Hydraulic inching
- Electric Pressure Cut-off 12/24 V

### Controls

- Hydraulic proportional without feed-back
- Hydraulic proportional with feed-back
- Manual without feed-back
- Manual with feed-back
- Electric Impulse 12 or 24 V
- Auto

C3 - 46/50/64

# Fixed Displacement Axial Piston Motors

## FIXED DISPLACEMENT AXIAL PISTON MOTORS 34/46/50/64 SERIES

### TECHNICAL DATA

Displacement		34 cc	46 cc	50 cc	64 cc
Max Rotation Speed Continuous	min <sup>-1</sup>	3600	3600	3600	3600
Max Rotation Speed Intermittent	min <sup>-1</sup>	3800	3800	3800	3800
Pressure Rating	bar	250	250	250	250
Peak Pressure	bar	400	400	400	400
Max Housing Pressure	bar	1.5	1.5	1.5	1.5
Max Oil Continuous Temperature	°C	80	80	80	80
ISO Filtration Class		ISO 18/16/13, NAS 8			
Optimized Oil Viscosity	mm <sup>2</sup> /s	15-35	15-35	15-35	15-35
Weight	Kg	13	13	13	13
Inertial Mess	N·m·s <sup>2</sup>	60 x 10 <sup>-4</sup>	60 x 10 <sup>-4</sup>	59 x 10 <sup>-4</sup>	59 x 10 <sup>-4</sup>

The fixed-displacement axial piston motors feature a swashplate-system and may operate in either closed or open circuit. Proper selection of materials and the use of steel cylinder blocks with inserted bushings guarantee the highest performance of the motors, in terms of max. speed and working pressure.

### Options

- Clockwise Rotation
- Counterclockwise Rotation
- 13/16 DP 15T Shaft
- SAE "B" 2 Bolts Flange
- "A" - "B" Ports 1-1/16-12 UN
- Drain 1-1/16-12 UN
- Hot Oil Valve
- Side Ports
- Rear Ports

### Main Features

- Exceptionally high power/weight ratio
  - Excellent volumetric and mechanical efficiency
  - Long life
  - Compact design
  - Exchange valve fitted as optional
- All dimensions are unchanged

34/46/50/64

48

# Variable Displacement Axial Piston Motors

VARIABLE DISPLACEMENT AXIAL PISTON MOTORS

## 46/50/65 SERIES

### TECHNICAL DATA

Displacement	46 cc	2.51 CIR
	50 cc	3.05 CIR
	65 cc	3.97 CIR
Continuous Pressure	280 bar	4060 psi
Intermittent Pressure	315 bar	4560 psi
Peak Pressure	350 bar	5075 psi
Minimum Output Speed	700 rpm	700 rpm
Maximum Output Speed	4000 rpm	4000 rpm
Weight	20 Kg	41 Lbs

The variable-displacement axial piston motors have been designed to work both in an open and closed circuit. Available control systems are making it easy to use these motors in any applications for industrial and mobile field.

### Options

- Reversing Rotation
- Electric 12V or 24V Control
- Hydraulic Remote Control
- 13/16 DP 15T Shaft
- SAE "B" 2 Bolts Flange
- "A" - "B" Ports 1-1/16-12 UN
- Drain Port 1-1/16-12
- Side Ports
- Rear Ports

### Control Systems

- 12V Electrical Control
- 24V Electrical Control
- Remote Hydraulic Servo-controls

46/50/65

49

## GENERAL INFORMATION

### Rotary Actuators

Young Powertech Rotary actuators are of the highest quality and performance. They have been applied in many applications all over the world for many years and now available from our USA facility.

ZERO leakage PTFE seals are used in all units to insure highest performance and long trouble free life.

The ARP series is built with large bearing capable of radial, axial and moment required in heavy duty application without the need of external bearings.

The shaft can be machined with a through hole for other functions.

Custom made units are available to OEM to meet specific requirements.

## YA10V SERIES 31

### Main Features

- Variable displacement axial piston pump
- SAE or ISO mounting flanges
- Continuous pressure to 4000 PSI
- High efficiency
- Low noise
- Wide range of controls
- Through drive for multi-circuit systems

### TECHNICAL DATA

Size				28	45	71	100	140	
Displacement			$V_{g \max}$	mL/r	28	45	71	100	140
Max.Speed <sup>(1)</sup>		at $V_{g \max}$	$n_{o \max}$	rpm	3000	2600	2200	2000	1800
Max.permitted Speed (limit speed) with increased input pressure		$P_{\text{abs}}$ bzw. $V_g < V_{g \max}$	$n_{o \max}$	rpm	3600	3100	2600	2400	2100
Max Flow		at $n_{o \max}$	$Q_{vo \max}$	L/min	84	117	156	200	252
		at $n_E=1500 \text{ min}^{-1}$		L/min	42	68	107	150	210
Max. Power ( $\Delta P= 28 \text{ MPa}$ )		at $n_{o \max}$	$P_{o \max}$	Kw	39	55	73	93	118
		at $n_E=1500 \text{ min}^{-1}$		Kw	20	32	50	70	98
Max. Torque ( $\Delta P= 28 \text{ MPa}$ )		at $V_{g \max}$	$T_{\max}$	Nm	125	200	316	445	623
Torque ( $\Delta P= 10 \text{ MPa}$ )		at $V_{g \max}$	T	Nm	45	72	113	159	223
Moment of Inertia about drive axis			J	kgm <sup>2</sup>	0.0017	0.0033	0.0083	0.0167	0.0242
Case Volume				L	0.7	1.0	1.6	2.2	3.0
Weight (without fluid)			m	Kg	15	12	33	45	60

## YHA2FM SERIES

### Main Features

Sizes **80 - 90 cc**  
 Nominal pressure **5000 PSI**  
 Peak pressure **6000 PSI**

- Fixed displacement motor YHA2FM of axial piston, bent axis design, suitable for hydrostatic drives in open and closed circuits
- Use in mobile and industrial applications
- High power density
- Compact design
- High overall efficiency

### TECHNICAL DATA

Size			80	90	
Displacement	$V_g$	mL/r	80.4	90.0	
Max.Speed <sup>(1)</sup>	$n_{max}$	min <sup>-1</sup>	4500	4500	
	$n_{max\ limit}$	min <sup>-1</sup>	5000	5000	
Max flow	$q_{v\ max}$	L/min	360	405	
Torque Constants	$T_k$	Nm/MPa	12.7	17.0	
Torque	at $\Delta P= 35\ MPa$	T	Nm	445	501
	at $\Delta P= 40\ MPa$	T	Nm	508	572
Torque ( $\Delta P= 10\ MPa$ )		L	0.55	0.55	
Mass Moment of Inertia around output shaft	J	kgm <sup>2</sup>	0.0072	0.0072	
Weight (without fluid)		Kg	23	23

## **LIMITED ONE YEAR WARRANTY**

If the products fails to function within one (1) year after the date of its original shipment, or invoice date whichever occurs first, due to a defect in the materials or workmanship, Young Powertech (YPT) will remedy the defect without charge to the consumer purchaser. The foregoing limited warranty does not cover failure to function caused by damage to the product while in your possession, improper installation, unreasonable use or abuse of the product, failure to provide or use of improper maintenance, failure to follow written installation and instructions.

THE REMEDIES PROVIDED IN THE ABOVE EXPRESS LIMITED WARRANTY ARE THE SOLE AND EXCLUSIVE REMEDIES AVAILABLE TO YOU. NO OTHER EXPRESS WARRANTIES ARE MADE. ALL IMPLIED WARRANTIES, INCLUDING BUT NOT LIMITED TO ANY IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OR USE, ARE LIMITED IN DURATION AS SET FORTH ABOVE. IN NO EVENT SHALL YPT BE LIABLE FOR ANY INCIDENTAL OR CONSEQUENTIAL DAMAGES.

Some states do not allow limitations on how long an implied warranty lasts or do not allow the exclusion or limitation of incidental or consequential damages, so the above limitations or exclusions may not apply to you. This warranty gives you specific legal rights and you may also have other rights which vary from state to state. The consumer-purchaser must maintain proof of purchase and shipment date of the product to prove the date of purchase and shipment in the unlikely event of a warranty claim.

In order to obtain a return authorization number you must contact Young Powertech Inc at **(610) 558-0760** prior to shipping. The customer will be required to ship only the defective parts, freight pre-paid to :

**Young Powertech Inc**  
**3060 Plaza Drive • Garnet Valley PA 19060 • Fax: (610) 558-0762**  
**e-mail: [info@youngpowertech.com](mailto:info@youngpowertech.com)**

Young Powertech Inc, will repair or replace any part found defective and return the unit prepaid by ground shipment to the customer.

In the event that the unit is not found to have a defect the customer will be charged an inspection fee and the unit will be returned freight collect to the customer.
